

retained in the concave portion has a boiling point of 70 °C or more and less than 100°C.

REMARKS

The above preliminary amendment is made to remove multiple dependencies from claims 22, 23 and 24.

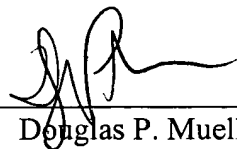

Applicants respectfully request that the preliminary amendment described herein be entered into the record prior to calculation of the filing fee and prior to examination and consideration of the above-identified application.

If a telephone conference would be helpful in resolving any issues concerning this communication, please contact Applicants' primary attorney-of record, Douglas P. Mueller (Reg. No. 30,300), at (612) 371.5237.

Respectfully submitted,

22. (Amended) The method for manufacturing a display device according to claim 16 [or 18], wherein the static contact angle with respect to pure water on the water-repellent surface is 90 degrees or more and the static contact angle with respect to pure water on the hydrophilic surface is less than 90 degrees.

23. (Amended) The method for manufacturing a display device according to claim 16 [or 18], wherein the static contact angle of the liquid used for pouring the charged substances is 60 degrees or more on the water-repellent surface and 50 degrees or less on the hydrophilic surface.

24. (Amended) The method for manufacturing a display device according to claim 16 [or 18], wherein the liquid in which the charged substance is dipped or the liquid to be retained in the concave portion has a boiling point of 70 °C or more and less than 100°C.
